Sprint:	GBW Sprint 1		

Description

The "E-Mail" Field is supposed to be a Mandatory Field which should not be left blank. Even though said field is left blank, the customer record can still be saved which should not be the case.

This is a major issue as well. The "E-Mail" Field serves as the data that identifies the Customer Record unique. Having the ability to leave this field blank will have a great impact on the system.
